27. Roof maintenance
28. Large, riding toys
29. Playground equip.
30. Water bikes
31. Tennis court
32. Water features
33. Outdoor shower

Meet Landa’s Hot and Cold Water Cleaning Solutions for Upscale Homes!

HOT: The VHG stationary hot water pressure washers provide the ideal multi-gun system for an upscale home. Powered by 120V or 230V 1ph electricity, the VHG heats the water using economical natural gas or LP. It delivers cleaning power of up to 4 GPM and 3000 PSI—more than enough for cleaning around the home.

COLD: Landa’s popular cabinet cold water pressure washer, the SEA, is loaded with features ideal for use around the home. Powered by 120V or 230V 1ph, the SEA offers cleaning power of up to 4.2 GPM and 2000 PSI. It, too, is capable of being plumbed to accommodate multiple wash outlets for plug-and-wash cleaning outdoors or indoors.
High-Pressure Cleaning Solutions for

UPSCALE HOMES

Nothing cleans faster, better and easier than a Landa pressure washer. Surprisingly, pressure washers also conserve water, using only a fraction of the water that is typically used when cleaning with a garden hose. Selecting a power washer is like painting—the bigger the brush, the faster you get the job done. Pressure (PSI) determines the width of the spray. High water volume (GPM) cleans more effectively. Both high PSI and GPM deliver an ideal knock out punch.

WHY hot water cleans faster and better

It’s a fact as obvious and elementary as washing dishes in the kitchen sink: hot water cleans faster and better than cold.

How? Higher temperatures cause water molecules to collide with each other creating energy that in turn causes grease and grime to break free from the surface to which they’re attached.

Hot water power washing, with water temperatures up to 200°F, also produces a sanitizing advantage especially important to the medical and food industries.

Over the years, it has been determined that heat isn’t the only element of cleaning that can impact effectiveness. Agitation (water volume and pressure) and soap are also crucial.

Hot water pressure washers bring together a perfect balance of water agitation (GPM and PSI), heat-friendly detergents and heated water to create the ideal cleaning machine.

HOW accessories help you clean even faster and better

Landa offers a broad selection of accessories designed to give a turbo-boost to your cleaning:

- Walk-behind, flat-surface cleaner ‘mows’ grime
- Wand extensions of up to 24 ft. high
- Hot water heaters

WHERE to get support

Landa’s high-pressure cleaning equipment is backed by a network of more than 200 authorized sales and service centers, trained to provide complete needs analysis, operator instructions and service support.

Landa has an extensive line of detergents formulated specifically for use with pressure washers in cleaning heavy equipment and construction-related machinery.
