

# WET<sup>®</sup>

WASHING EQUIPMENT OF TEXAS

# TYPHOON I

The **Typhoon I** is the workhorse of WET's industrial line of pressure washers. Reliability, performance, and endurance normally come at a price, but this 'tank' has a unique design feature not found anywhere else.

**Clutch Control** prohibits the pump from overheating when the trigger is not pulled. Other pressure washers recirculate the bypass water through the pump again and again. Each time through the pump the water temperature increases dramatically until it reaches the critical temperature of 145°F in less than a minute.

The **Typhoon I** does not bypass water because the pump comes to a complete stop when the trigger gun is released! This advancement alone will greatly reduce downtime and cost of ownership. Pump life and endurance are increased tenfold!

**Clutch Control** with lots of Stainless Steel, the best fuel filtration, a rugged 1-¼" square tubing frame, and industrial components make the **Typhoon I** inexpensive to own and a pleasure to use.

*The Typhoon I ..... is high on quality*

*The Typhoon I ..... is feature rich*

*The Typhoon I..... is a workhorse by design*

### Specifications:

- + 4-gpm @ 3000-psi
- + 8-hp Baldor motor, 230-v, 1-ph, 40 amps
- + General pump
- + Belt-driven
- + **Clutch Control**
- + SS lid & heat shield
- + SS float tank
- + GFCI
- + 50' hi-pressure hose
- + SS Variable pressure wand & trigger gun
- + (4) 13" pneumatic tires
- + Hose & gun holders
- + Racor fuel/water filter
- + Hose reel insert port
- + 366,000 BTUs, diesel
- + 580 lbs

WASHING EQUIPMENT OF TEXAS

FLOW THROUGH ALL PRESSURE WASHERS WHEN TRIGGER IS PULLED

FLOW THROUGH OTHER PRESSURE WASHERS WHEN TRIGGER IS NOT PULLED

FLOW THROUGH A WET PRESSURE WASHER WHEN TRIGGER IS NOT PULLED

THE TRAPPED WATER IS COOLED BEFORE RETURNING TO THE PUMP

**MADE IN**  
**THE USA** 

WET offers a wide variety of industrial cleaning compounds:

-  Degreasers
-  Vehicle wash
-  Floor cleaning detergents
-  Automatic parts washer detergents
-  Aluminum brighteners
-  Defoamers
-  Detergents especially formulated for wash water recycling systems

WET offers preventive maintenance programs for high volume detergent customers saving delivery fees, reduced labor charges, and even parts discounts in return for their business

WET offers detergents in bulk volume where we provide the 300-gallon storage tank:

-  No (55) gallon drums
-  Bulk volume pricing
-  Industrial strength concentrates

WET supplies their customers using the bulk detergent program with a free loaner pressure washer when their machine is down.

We value our customers, and we hope it shows!
